Workshop, Pesticide Residue Analytical Result - Need to postpone meeting

Due to several factors and challenges beyond ODA's control, specifically analytical equipment and organic sample matrix issues, the environmental sample data will not be available for our review/discussion scheduled for December 9, 2011 meeting. This meeting will need to be rescheduled in the near future. Jae Douglas and I will be determining new potential dates, times and location as we get a better feel for the data availability.

We will keep you posted as new information becomes available. Thank you in advance for your for your patience and understanding.

RURAL OREGON RESIDENTS AWAIT PESTICIDE EXPOSURE INVESTIGATION RESULTS - KPLU NEWS FOR SEATTLE AND THE NORTHWEST

They believe herbicide spraying by the timber industry is causing health issues in their communities. For years, residents near Blachly and Triangle Lake have complained of pesticide drift from clear-cut sprays. But it wasn't until last spring that ...
